# Group Report

## Dear Shareholders,

Your Company recorded high capacity utilization in the first quarter of 2012 in both divisions, although the previous quarters were marked by a considerable slowdown in the order intake due to destocking at our customers and seasonal influences. At EUR 494.9 million, sales reached previous year's level, while the operating profit was below the historical record value of the comparative period in 2011 due to a significant increase in input costs but in line with precedent quarters. The operating margin of the Group reached 8.5 % (1Q 2011: 10.1 %).

From today's point of view, the better volume development in the first three months of this year probably only served the restocking of the emptied supply chain. Thus, the volatility in demand again shows material increases for both Cartonboard and Packaging, as consumers in Europe reduce their expenditure and our customers plan accordingly in the short term.

In line with strategy, the expansion in Latin America has proceeded and a participation in the largest Colombian folding carton manufacturer, Gráficas Los Andes S.A., located in Santiago de Cali, was acquired. In Great Britain, the folding carton production at the Liverpool site was discontinued.

## Income statement

The consolidated sales of the Group of EUR 494.9 million again reached previous year's level (1Q 2011: EUR 494.7 million), especially due to improved average prices.

Consolidated sales by destination (according to IFRS for interim financial reporting, unaudited)

(in %)	1 <sup>st</sup> Quarter	
	Jan. 1 - Mar. 31, 2012	Jan. 1 - Mar. 31, 2011
Western Europe	64.0 %	65.4 %
Eastern Europe	24.4 %	23.5 %
Asia	4.0 %	3.6 %
Latin America	4.2 %	3.6 %
Other	3.4 %	3.9 %
<b>Total</b>	<b>100.0 %</b>	<b>100.0 %</b>

Operating profit was at EUR 42.1 million, thus EUR 7.9 million or 15.8 % below the historical peak value of the first quarter 2011 (EUR 50.0 million). This difference is mainly attributable to the significant increase in input costs.

Financial income of EUR 0.9 million (1Q 2011: EUR 1.0 million) was offset by financial expenses of EUR -1.5 million (1Q 2011: EUR -1.2 million).

The profit before tax reached EUR 39.6 million, following EUR 48.5 million in the first quarter of the previous year. Income tax expense amounted to EUR 11.1 million (1Q 2011: EUR 13.1 million), hence the effective tax rate of the Group was 28.0 % (1Q 2011: 27.0 %).

Consequently, the profit for the period of EUR 28.5 million reached previous quarters' levels (4Q 2011: EUR 26.8 million; 3Q 2011: EUR 27.9 million; 2Q 2011: EUR 28.6 million), but was below the record value of the first quarter 2011 (EUR 35.4 million).

### Assets, capital and liquid funds

As of March 31, 2012, the Group's total assets amounted to EUR 1,614.2 million and thus were above the comparative value at year-end 2011 by EUR 47.6 million (December 31, 2011: EUR 1,566.6 million). This increase is mostly attributable to the result-related rise in equity.

Financial liabilities, consisting in almost equal parts of non-current and current liabilities, were reduced by repayments of EUR 10.0 million to EUR 130.9 million. Total funds available to the Group in the amount of EUR 347.8 million mostly maintained the level at year-end 2011 (December 31, 2011: EUR 349.5 million), thereby the net liquidity slightly increased to EUR 216.9 million (December 31, 2011: EUR 208.6 million).

Current assets rose by EUR 41.7 million to EUR 913.2 million compared to year-end 2011, mostly attributable to improved operating activities.

### Cash flow development

Cash flow from operating activities came in at EUR 33.5 million and therefore was EUR 11.0 million above previous year's level (1Q 2011: EUR 22.5 million). This increase is mainly due to a lower build-up of working capital.

Cash flow from investing activities reached EUR -22.7 million, compared to EUR -24.4 million in the first three months of 2011. The difference is mostly attributable to the slightly lower expenses for the acquisition of tangible fixed assets. Investments focused above all on technological modernizations and expansions.

Cash flow from financing activities went up from EUR -2.2 million to EUR -12.6 million, mostly due to higher repayments of financial liabilities.

### Further information

At the beginning of April 2012, MM Packaging acquired a share of 20 % in the largest Columbian folding carton manufacturer, Gráficas Los Andes S.A., located in Santiago de Cali. MM Packaging holds an option right to the remaining share of 80 %. Gráficas Los Andes S.A. currently generates annual sales of approximately EUR 17 million with about 200 employees.

### Outlook

The economic forecasts are still gloomy, causing a lot of uncertainty and insecurity on the economic climate. Thereby the stagnation in our main market Europe remains more than evident, as the consumers restrict their spending and the savings rate among private households rises again. In the light of this, the improved quantity dynamics of the first quarter are likely to be merely a reflection of the restocking of the supply chain. The volatility in demand is gaining momentum both for Cartonboard and Packaging. Therefore, our customers plan accordingly in the short term.

If the current volatility in demand remains unchanged, our input markets will follow with the consequence that the challenges for price and cost management will increase significantly.

However, it is still our goal to defend our margins as best possible in an environment of intense competition and to resolutely push market penetration and expansion.

## Divisions

### MM KARTON

While the last two quarters in the previous year saw a considerable decrease in incoming orders due to on-going destocking at our customers, the cartonboard business experienced a noticeable recovery in demand in the first quarter of 2012 as the supply chain was being restocked. However, with an average order backlog of 74,000 tons (1Q 2011: 135,000 tons), the dynamics in demand were significantly more restrained than in the first quarter 2011, which was still profiting from the expiring boom of 2010.

However, in line with improved demand the procurement markets for recovered paper and all input factors related to crude oil prices were again characterized by a strong upward trend. This was a particular challenge, as the cartonboard markets have been subject to an extremely intense price competition for months as a consequence of the weakening economic development.

At a high capacity utilization of around 97 % (1Q 2011: 98 %), we managed however again to achieve a good operating margin of 7.2 % (4Q 2011: 5.5 %; 3Q 2011: 5.6 %; 2Q 2011: 7.6 %), though standing below the peak value of the first quarter 2011 (10.0 %).

Like in the previous year, approximately 390,000 tons of cartonboard were produced in the first three months, while the tonnage sold went down by roughly 5.3 % to 378,000 tons (1Q 2011: 399,000 tons). Thereof, 82 % were sold within Europe and 18 % in non-European markets (1Q 2011: 81 %; 19 %).

Accordingly, sales went down by 4.9 % to EUR 231.4 million (1Q 2011: EUR 243.4 million). The operating profit, due to costs as well as quantity, amounted to EUR 16.6 million, compared to EUR 24.3 million in the first quarter of 2011.

## MM PACKAGING

Analogously to the consumer goods industry, the folding carton markets in Europe have entered into a very intense price competition since the beginning of the year preparing for a stagnation and constriction of quantities. Taking that into account, MM Packaging concentrates on defending its market shares and margins as best possible, focusing on cost leadership by employing highly efficient production methods and sustainable fulfillment of customer requirements.

Despite increasing headwinds, MM Packaging managed to maintain a good level for both operating income and sales in the first three months of 2012, however, the heterogeneity in the contribution to the operating income of the individual mills saw a significant rise. The sales sectors food and cigarettes remained stable, however, they are also experiencing the increased volatility in demand.

In particular due to price factors, sales went up by 2.9 % to EUR 289.3 million (1Q 2011: EUR 281.2 million), while the operating profit of EUR 25.5 million was below the comparative value (1Q 2011: EUR 25.7 million) especially because of expenses in connection with the closure of the British folding carton plant in Liverpool. This resulted in an operating margin of 8.8 %, subsequent to 9.1 %.

The tonnage processed decreased by 11,000 tons to 166,000 tons, mostly due to changes in the product mix and savings.

### Closure of the British folding carton site in Liverpool

At the end of March 2012, Mayr-Melnhof Packaging announced the closure of its folding carton production in Liverpool. During the last few years, the Liverpool team put in a lot of effort to increase the competitiveness of the site in order to maintain the plant. However, economic circumstances and the most recent market developments as well as our customers' requirements compelled us to take this decisive measure. The plant in Liverpool employed at last 109 people. This measure does not affect customers, as they are being supplied by the European MMP production network.
